Project 4 – Save your Fork

Description	Pts	Your Score
1. Using your editor, open the sf_torte_txt.html and sf_effects_txt.css files from the html04 > case1 folder. Enter your name and the date in the comment section of each file, and save them as **sf_torte.html** and **sf_effects.css** respectively.	1	
2. Go to the **sf_torte.html** file in your editor. Within the document head create links to the sf_base.css, sf_layout.css, and **sf_effects.css** style sheet files in that order. Take some time to study the structure of the document and then close the document, saving your changes.	2	
3. Go to the **sf_effects.css** file in your editor. Within the Body Header Styles section, create a style rule for the body element to add drop shadows to the left and right border of the page body with an offset of 10 pixels, a blur of 50 pixels, and the color rgb(51, 51, 51).	4	
4. Go to the Navigation Tabs List Styles section. Create a style rule for the body > header nav.tabs selector that changes the background to the image file sf_back1.png with no tiling, centered horizontally and vertically within the element and sized to cover the entire navigation list.	4	
5. Create a style rule for the body > header nav.tabs li selector that transforms the list item by setting the perspective of its 3D space to 50 pixels and rotating it 20° around the x-axis.	2	
6. Create a style rule for the body > header nav.tabs li selector that uses the pseudo-element hover that changes the background color to rgb(231, 231, 231).	3	
7. For the vertical navigation lists in the left section, create a style rule for the section#left nav.vertical selector that adds a 1-pixel solid border with color value rgb(20, 167, 170) and has a radius of 25 pixels at each corner.	4	
8. Create a style rule for hi elements nested within the left section vertical navigation list that sets the top-left and top-right corner radii to 25 pixels.	3	
9. Create a style rule for the section#center article selector that adds the following: a) a radial gradient to the background with a white center with a color stop of 30% transitioning to rgb(151, 151, 151), b) a 1-pixel solid border with color value rgb(151, 151, 151) and a radius of 50 pixels, and c) a box shadow with horizontal and vertical offsets of 10 pixels with a 20-pixel blur and a color of rgb(51, 51, 51).	6	
10. For every blockquote element, create a style rule that does the following: a) sets the background image to the sf_speech.png with no tiling and a horizontal and vertical size of 100% to cover the entire block quote, and b) uses the drop-shadow filter to add a drop shadow around the speech bubble with horizontal and vertical offsets of 5 pixels, a blur of 10 pixels and the color rgb(51, 51, 51).	6	
11. Create a style rule for the selector cite img that sets the border radius to 50%.	3
